Q1. Create an html file named **ProductEntry.html** which contains product entry form with the following fields:

a. ID   [text box]

b. Name [text box]

c. Type(food, soap, shampoo) [list box]

d. Imported [check box]

e. Price [text box]

f. Manufacturer [text area]

Q2. Create an html document named **text.html** to show the following paragraph:

The Cascade

People often wonder where the term *cascading* comes from. The cascade is an *application hierarchy*, which is a fancy term for a system of how rules are applied. If you examine the **five types** of style sheets just introduced, you'll notice that there are numerous means of applying style to the same document.

Q3. Create an html document named **ProductList.html** to show the following information:

Product List:

Type	Name	Price	Imported
	Pringles chip	125	Y
Food	Dry Cake	150	N
	Mr. Cookie	12	N

Q4. Create an html form named **Menu.html** which contains three link items:

a. Paragraph

b. Form

c. Table
